Your advantage: franchised Lines & Brokerage

Thanks to our international branches, we are perfectly connected and rely on a hybrid model to meet the challenges of our customers: With strong manufacturers we represent as a franchised distributor as well as strong relationships with other distributors and worldwide sources to offer our customers all needed common, obsolete as well as hard-to-find components from almost all manufacturers.

Among others these include Texas Instruments, Intel, Micron, Qualcomm, Xilinx, STM, NXP, Infineon, Microchip, Analog Devices and many more. For this purpose, we work only with carefully selected partners to offer you a fast delivery under consideration of all our quality requirements.

Our services

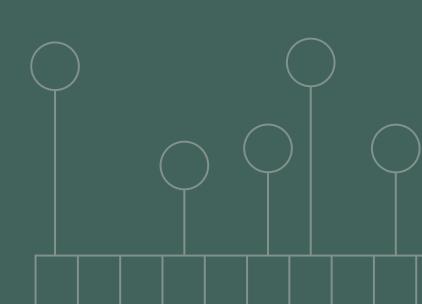

- Active supply chain management
- BOM Optimization including cost optimization
- We are pleased to offer you the possibility of arranging frame contract or setting up safety stocks
- Customized solutions
- Obsolete as well as hard-tofind components sourcing

Our strengths

- A hybrid model of franchise lines and independent international component sourcing
- Flexible approach
- Fast response times
- Reliability
- You can count on a dynamic team and a personal contact for all your needs
- Development support with the collaboration of our strong partners

Our clients

- Automotive
- Industrial
- Medical
- Contract Manufacturing/ Assembler
- · Embedded Solutions
- Telecommunications
- Aerospace

OUR PARTNERS

Optoelectronics

LED-driver

MY-Semi Inc.

high power LED drivers - DMX drivers

Silicon Touch Technology Inc.

LED drivers - motor drivers - power IC's

LED's & LED Displays

Quelighting Co. Ltd.

SMD LED's - white LED's - RGB LED's - COB - UV LED's - IR LED's - special bins

Harvatek Corp.

SMD LED's – high power LED's – COB

Visual Communication Company VCC

light pipes – panel mount indicators – circuit board indicators – LED's – LED displays – lamps – panel lenses & clips

QT Brightek

SMD LED's - LED displays

P-Tec Inc.

SMD LED's - LED & LCD displays

OptoSupply Ltd.

THT LED's - SMD LED's - COB

Ligitek

SMD LED's - infrared LED's - DOT matrix

Displays

Orient Display

TN/STN/FSTN LCD modules – monochrome/color TFT modules – embedded LCD – touch panel – glass panel

Gunze Inc

touch - PCAP - analog resistive - controllers

OUR PARTNERS

Connectors

AMTEK Technology Co. Ltd.

connectors - cables - RJ45

Sullins Connector Solutions Inc.

high temperature - high voltage - military

Attend Technology Inc. SIM-card connectors - round cable connectors

SULLINS

Switches

Taiway Electronics Co. Ltd.

toggle switches – slide switch – touch switch

TAI WAY® Switches/ Since 1976

Microprecision Electronics SA

micro switches - position switches - safety switches

Powermanagement/IC's

ANPEC Electronics Corp.

amplifier IC's - driver IC's - switch IC's

Sinopower Semiconductor Inc.

power MOSFETs - NMOS - PMOS

PREMA Semiconductor GmbH

semiconductors - ASICs - ASSPs

Unisonic Technologies Co. Ltd.

power management IC's – transistors

CEC Panda Crystal Technology Corp.

crystals - TCXO - VCXO - OCXO

capacitors - radial type - screw - snap in

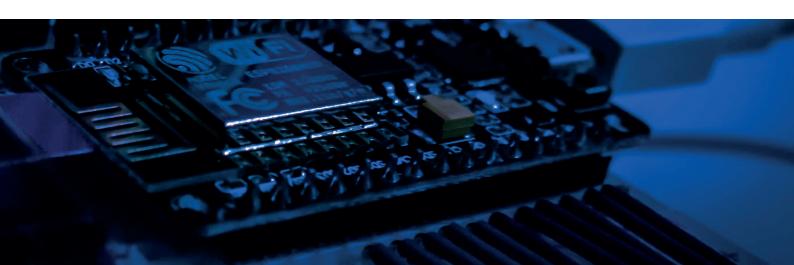

Daco Semiconductor Co. Ltd.

high power diodes rectifier-modules - high power schottky rectifiers three-phase-bridges

OUR PARTNERS

Embedded Solutions

Novasome Industries

SOM - single board computers - display - custom solutions

NOVASOR Embedded Systems

Western Design Center

8-Bit MPU - 8/16-Bit MCU - Adapter

Linx Technologies Inc.

RF modules - GPS modules - connectors - antennas

Diodes

Comchip Technology Inc.

diodes - Schottky - mosfets

Diotec

semiconductors - rectifiers

Thermal Management

Cooltron Inc.

fans - blowers - heat sinks

Passive Components

Allied Components Corp.

inductors - chokes - transformers

Coilmaster Electronics Inc.

Inductors - multilayer ferrit - filters

Fair-Rite inc.

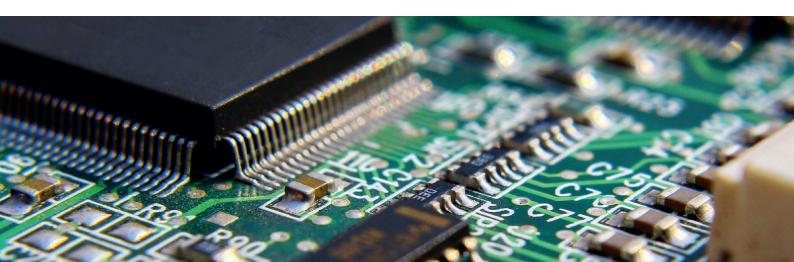

ferrite - beads - cable EMI - magnetic circuit - shielding

Cal-Chip Electronics Inc.

capacitors - chokes - ferrit

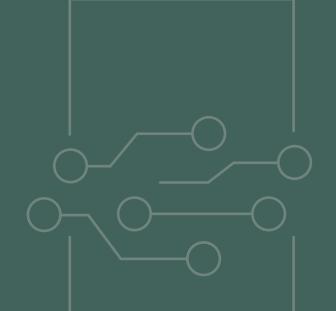

SINCE 1958

"The Republic Group" was founded in 1958 by Burton B. Fagan in Arlington, Virginia, USA, as an engineering and procurement office for the Italian company Selenia S.p.A. Gradually, the representation of other manufacturers was added, so that the company developed as a service provider in the field of trade with electronic and electromechanical components.

In 1991 the branch in Germany was founded, in 1996 the branch in England and in 1998 the branch in Sweden. Today TRG Components is a modern distributor, which, with its international procurement network and the represented manufacturers, always strives to help you as a partner in the realization of your applications and to offer more favorable alternatives to the existing components.

Great importance is attached to constructive cooperation as well as to excellent quality. Therefore, TRG Components is certified according to DIN EN ISO 9001:2015.

TRG Components GmbH

Am Wiesenpfad 43 D-53340 Meckenheim
